Asim Khan

Flutter Developer — Cross-Platform Mobile Applications

Peshawar, KPK, Pakistan +92 322 1920894 asimxdev@gmail.com
LinkedIn GitHub Portfolio

PROFILE

Flutter Developer with **2+ years of experience** building responsive cross-platform mobile applications using Flutter and Dart. Skilled in Firebase SDKs, payment gateway integration, BLoC, and Stacked Architecture. Experienced in real-time communication using WebSockets, audio and video calling, API integration, debugging, and performance optimization, with a focus on scalable, maintainable, and high-quality mobile applications.

PROFESSIONAL EXPERIENCE

Flutter Developer **Dec 2025 – Present**
Apptex Software Solutions, Pakistan

- Develop and maintain cross-platform mobile applications using Flutter, ensuring responsive, reliable, and user-friendly experiences.
- Integrate REST APIs and third-party services to deliver features and improve application functionality.
- Test applications across devices, identify bugs, verify functionality, and support smooth user experiences.
- Perform QA testing, review UI/UX consistency, report issues, and verify fixes to maintain application quality.
- Collaborate with developers and team members to solve problems and deliver projects on time.

Flutter Developer **Apr 2025 – Dec 2025**
FS Programmers, Pakistan

- Developed and maintained cross-platform mobile applications using Flutter.
- Integrated APIs and third-party services to enhance application functionality.
- Troubleshot and resolved application performance, bug, and UI/UX issues.
- Collaborated with developers to deliver applications and resolve issues on time.

Flutter Trainee **Jan 2024 – Apr 2025**
ProTech Code Park (PTCP), Pakistan

- Assisted in developing Flutter applications under the guidance of senior developers.
- Practiced Flutter, Dart, Provider, reusable widget development, REST API integration, and Firebase services.
- Contributed to Riter AI, an AI-powered content-generation application using the OpenAI API.
- Strengthened coding, debugging, and problem-solving skills through hands-on training and projects.

TECHNICAL SKILLS

Mobile Development: Flutter, Cross-Platform App Development, Android
Programming Languages: Dart, Java (Basics)
State Management: BLoC, Riverpod, Provider, setState
Backend & Firebase: Firebase SDKs, Firestore, Firebase Authentication, Cloud Functions, Storage
Architecture: MVVM, Stacked Architecture
Payment Integration: Stripe, Payment Gateway APIs
Real-Time Communication: WebSockets, Audio Calling, Video Calling
API Integration: RESTful APIs, OpenAI API
UI/UX: Figma, Flutter UI Widgets, Responsive UI
Version Control: Git, GitHub
Development Tools: Android Studio, VS Code, Postman, Firebase Console
Other Skills: Push Notifications, QA Testing, Debugging, Performance Optimization

SELECTED PROJECTS

TourVista App

- Contributed to an AI-powered travel app featuring landmark scanning, historical information, nearby-place discovery, interactive maps, personalized tour planning, saved landmarks, travel memories, and AI-powered chat.

Photos by Bugs

- Contributed to a photo-selling app that organizes collections using Google Drive, provides blurred and watermarked previews, and unlocks full-resolution photos after purchase.

Penitans App
- Contributed to an app where practitioners offer services to seekers, who can accept offers and access services online.

Musculo App
- Contributed to the Musculo fitness app built with Flutter and Firebase, supporting user and creator roles, workout purchases, favorites, and content creation and sales.

Wilmarwell App
- Worked on a healthcare and wellness app offering skincare, massage therapy, fitness education, and appointment booking.

Khan LPG Gas App
- Contributed to an app supporting gas cylinder orders, pickup and delivery services, and map-based order tracking.

PrayPal – Prayer Time Tracking App
- Contributed to the final-year project by improving UI design and code maintainability through refactoring.

Riter AI App
- Developed an AI-powered Flutter app using the OpenAI API to generate LinkedIn posts, client proposals, blog posts, Fiverr gigs, and other professional content.

Allah Knows App
- Developed a women-focused Islamic wellness app for emotional reflection, spiritual guidance, and connection with Allah through faith and mindfulness.

Jet Picks App
- Designed the UI for a travel-based delivery app connecting travelers with people who need items delivered internationally.

Armor Up App
- Developed the UI for a gamified spiritual-support app offering Bible-based and AI-powered guidance through interactive levels.

EDUCATION

Bachelor of Science in Computer Science **2020 – 2024**
University of FATA, FR-Kohat, Pakistan *CGPA: 3.86 / 4.00*

CERTIFICATIONS

Flutter Training
ProTech Code Park (PTCP), Peshawar, Pakistan

Certificate in IT (CIT) – Web Graphics and Mobile App Development
NAVTTC, FATA University, FR-Kohat, Pakistan

Diploma of Information Technology (DIT)
ZEB Institute of IT, Mattani, Peshawar

LANGUAGES

English

Urdu
